GDG on Campus · JIS University

Started in 2022 –

INITIATED BY

Ayushman Bhattacharya

Organiser, GDG on Campus JIS University (2025–26) · Roll No.
23CS2021016

MAINTAINED BY

Current Lead

passed forward, lead to lead

Document Provenance

This report was compiled by **Ayushman Bhattacharya**, Organiser of GDG on Campus JIS University for 2025–26, from the chapter’s event records and public activity trail. Attendance, entrant and submission figures are labelled according to what each source measured.

The report records **36 events across four organiser tenures**, including all **21 events** completed during the 2025–26 organiser tenure. The 21st event was the Gemma for Bharat Swag Distribution & Workshop on 22 July 2026. HexaFalls 2 is a separate departmental techfest and is not included in the DSCJISU event record.

Revision note.

Attendance terminology and the completed-season total were reconciled on 31 July 2026 before publication of this edition.

Foreword & About this Report

GDG on Campus JIS University — formerly *Google Developer Student Clubs (GDSC)* — is a student-led technical community operating under the Department of Computer Science & Engineering, JIS University. *Run by the students, for the students*, it has grown across four operational years into one of the largest and most active student organisations in the university, with a community of **~1,800 members** drawn from every academic background.

We build across Artificial Intelligence, Web Development, Cloud Computing, Cybersecurity, Mobile Development, Open Source and System Design — through workshops, hackathons, bootcamps, speaker sessions and study jams. Beyond the technical, we invest in peer mentorship, teamwork and community-driven growth, so that each cohort leaves stronger than it arrived and sets the bar for the next.

Why this document exists.

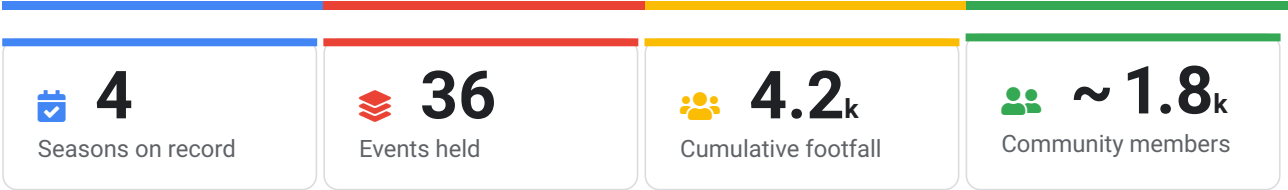

This is the chapter's institutional memory. Leadership turns over every year; the work should not start from zero each time. The report records *what was run, by whom, with which partners, and at what scale* — season by season, since 2022. It is deliberately factual: attendance figures are reported as recorded on the day, and event details are preserved as documented by the organising team of each season.

→ For the next lead.

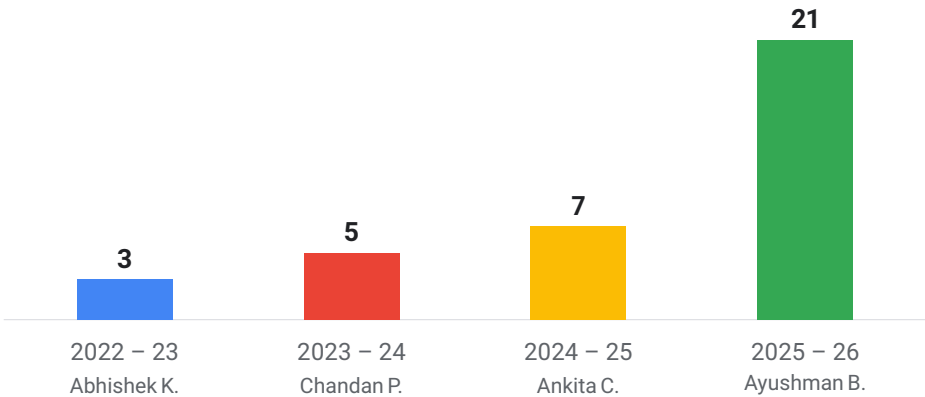

A community is only as strong as the memory it keeps. You inherit not just a chapter, but a promise — that the people who came before you are not forgotten, and that the people who come after you will stand on something solid. Add your season honestly, in full, and in your own voice. Nothing here belongs to any one of us; it belongs to whoever chooses to carry it next. When your time is done, hand it forward — a little larger, a little truer than you found it.

A note on numbering & naming. The original working records carried a few clerical artefacts (a skipped index, a split entry, and the mid-life rebrand from GDSC to GDG). This report renumbers all events sequentially and notes the brand in force each season; no events were added or removed in doing so.

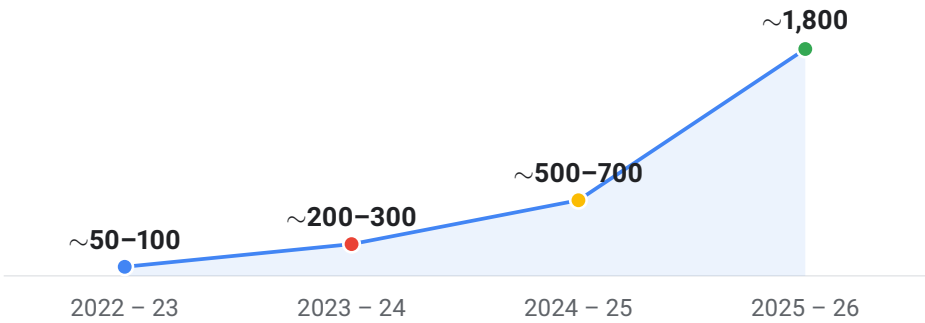

At a Glance (2022–26)

Events per season — cadence has grown every year, from 3 in the founding season to 21 in 2025–26.

Community growth — approximate registered membership at the close of each season, from a founding cohort of well under a hundred to around 1,800 today.

SEASON LEDGER

Season	Brand	Organiser	Core	Members	Events	Footfall
2022 – 23	GDSC	Abhishek Kushwaha	5	~50–100	3	315
2023 – 24	GDSC	Chandan Pandey	6	~200–300	5	425
2024 – 25	GDG	Ankita Chakraborty	8	~500–700	7	565
2025 – 26	GDG	Ayushman Bhattacharya	12	~1,800	21	2,929
Total				~1,800	36	4,234

Footfall is cumulative event attendance across the season (range midpoints where a range was recorded); attendees recur across events, so this counts participation, not unique members.

Leadership Lineage (2022–26)

Each organiser inherited a chapter and grew it, from 2022 to 2026. This is the chain of custody.

● 2022 – 23 (GDSC)

Abhishek Kushwaha — Founding Organiser

Roll No. _____

The founding season. The chapter is established under the Department of Computer Science & Engineering and runs its first info session, its first external speaker workshop, and its first hosted codefest.

● 2023 – 24 (GDSC)

Chandan Pandey — Organiser

Roll No. _____

Consolidation. Study Jams and a source-code contribution drive push the chapter deeper into cloud skilling and open source, alongside the annual onboarding session and a hands-on web bootcamp.

● 2024 – 25 (GDG)

Ankita Chakraborty — Organiser

Roll No. _____

Rebrand to Google Developer Groups (GDG) on Campus and a step-up in cadence: cross-chapter collaborations (Solution Challenge, React), security and Web3 tracks, and the first Build with AI.

● 2025 – 26 (GDG)

Ayushman Bhattacharya — Organiser (current)

Roll No. **23CS2021016**

The largest season on record — national hackathons, Hacktoberfest, GSoC preparation, live CTF and system-design tracks, a Kubernetes/CNCF meetup and cross-community welcomes with OWASP. This report is compiled during, and as part of, this tenure.

2022 – 23

Google Developer Student Clubs

Organiser **Abhishek Kushwaha**

The founding season. The chapter is established under the Department of Computer Science & Engineering and runs its first info session, its first external speaker workshop, and its first hosted codefest.

3 events 5 core ~50–100 members 315 footfall GDSC brand

01

Info Session – Class of 2022–23

On-Site

The founding season's opening event. It introduced GDSC JIS University to a fresh cohort – the community's mission, the technical domains it would explore, and the ways students could take part as members and volunteers. As the first gathering under the newly-formed chapter, it doubled as the recruitment drive for the founding core team.

-  **Date** 27 August 2022 · JIS University
-  **Duration** 11:00 AM IST
-  **Speaker(s)** Abhishek Kushwaha

02

Interacting with the Unique Blockchain: From Zero to Hero

Virtual

A beginner-friendly virtual workshop on the Unique Network / Polkadot ecosystem, delivered by an industry developer. It walked students with no prior Web3 background through the fundamentals of building on a substrate-based blockchain, and broadened the chapter's early programming beyond web and cloud into emerging decentralised technology.

	Date	3 September 2022 · JIS University
	Duration	4:00 PM IST
	Speaker(s)	Alexander Saft
	Partners	Unique
	Attendance	70–80 participants

03

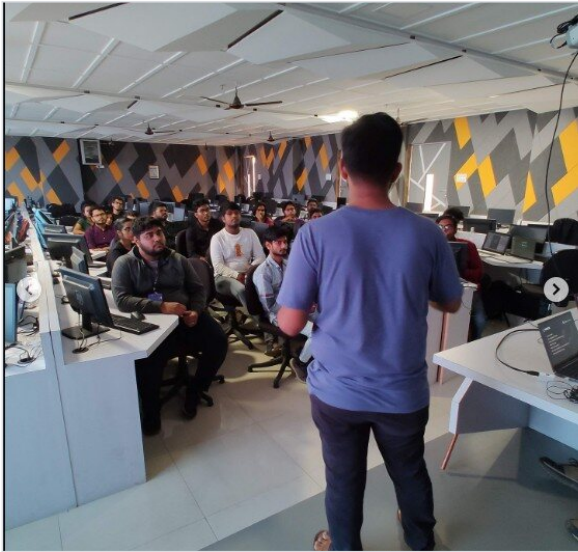

GDG JISU Codefest 2023

On-Site

The chapter's first hosted competitive-coding event, run on-site across a full day. Spanning tooling from GitHub, Flutter, Firebase and Android, it put 150 students in a deadline-driven build environment with mentors on the floor. Codefest established the chapter's flagship habit of large, practical, project-first gatherings.

	Date	21 March 2023 · JIS University
	Duration	10:00 AM – 3:30 PM
	Speaker(s)	Arkaprabha Chakraborty, Manish Kr Barnwal, Soumyadeep Chowdhury, Shubhayu Majumder
	Partners	GitHub, Flutter, Firebase, Android
	Attendance	150 participants

06

Hack the Source

On-Site

An on-site open-source contribution session led by a panel of student and community speakers. It demystified contributing to real repositories across the GitHub, Google and Salesforce ecosystems, and pushed members from consumers of software toward first-time open-source contributors.

-  **Date** 25 November 2023 · JIS University
-  **Duration** 12:00 – 2:00 PM
-  **Speaker(s)** Harshbardhan Bajoriya, Shinjini Roy, Ronit Banerjee, Khayati Mehta, Anirudha Basak
-  **Partners** GitHub, Google, Salesforce
-  **Attendance** 60–70 participants

EVENT GALLERY

07

Google Study Jams 2023

On-Site

A month-long distributed cloud study-jam cohort that closed with swag distribution for 80+ completions. It reinforced consistent, milestone-based skilling on Google Cloud, and the high completion count reflected the chapter's growing ability to sustain longer-form programs.

	Date	11 October – 12 November 2023 · JIS University
	Duration	1 month
	Speaker(s)	Facilitated cohort
	Partners	Google Cloud Skills Boost
	Attendance	80–90 participants

11

Rectify: The Ultimate React Workshop

Virtual

A multi-chapter React workshop bringing together speakers from industry and several GDG campuses. It gave students practical, component-first frontend skills, and its wide co-host list signalled the chapter's growing inter-campus network.

	Date	26 December 2024 · JIS University
	Duration	7:00 – 9:30 PM
	Speaker(s)	Ayushman Bhattacharya, Manish Gupta, Krishnendu Dasgupta
	Partners	Altor Smart Mobility, GDG JISU, GDG GCECT, GDG SNJB, GDG XIE
	Attendance	80–90 participants

EVENT GALLERY

12

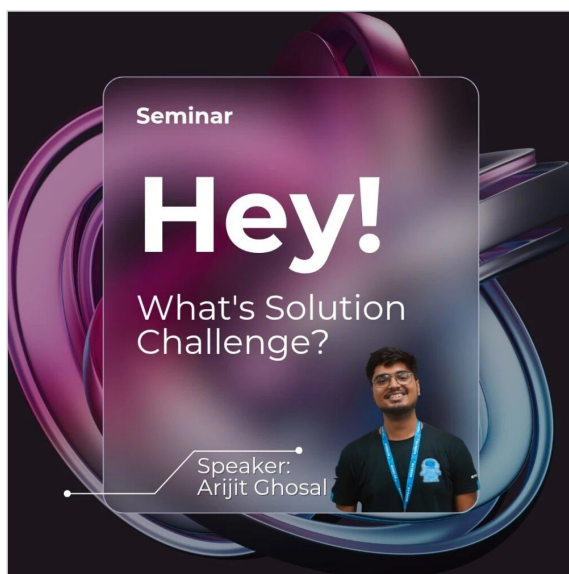

Google Solution Challenge Workshop

Virtual

A preparatory workshop for Google's global Solution Challenge, co-hosted across seven GDG chapters. It explained the challenge format and helped students shape socially-impactful project ideas, positioning members to compete on an international stage.

	Date	26 December 2024 · JIS University
	Duration	7:00 – 9:30 PM
	Speaker(s)	Arijit Ghosal
	Partners	GDG JISU, GDG GCECT, GDG SNJB, GDG XIE, GDG GCELT, GDG TMSL, GDG TIU
	Attendance	80–90 participants

Open Source Friday: Building the Contributor Pipeline at Pollinations.ai

Virtual

In this Open Source Friday stream, Ayushman Bhattacharya shares how Pollinations.ai built the systems behind a fast-growing open source AI project. We'll dig into contributor workflows, paid quests, AI-assisted PR review, app submission pipelines, model curation, and what maintainers really spend their day doing.

	Date	10th July 2026 · GitHub Livestream (Virtual)
	Duration	10:00 PM – 11:30 PM
	Speaker(s)	Ayushman Bhattacharya, Gwyneth Penya Seguenza
	Partners	GitHub Events
	Attendance	850 participants
